Pranshu Pal

palpranshu913@gmail.com | (+91) 9084895201 | LinkedIn | GitHub | LeetCode | Etawah, Uttar Pradesh

Professional Summary

AI-driven Software Engineering student with hands-on experience in Java, JavaScript, React.js, Node.js, and MongoDB. Skilled in building automation solutions, REST APIs, and data-driven applications using AI tools including ChatGPT, GitHub Copilot, and Prompt Engineering. Strong analytical mindset with experience solving 300+ DSA problems, developing scalable software, and collaborating across teams. Passionate about AI automation, analytics, product development, and solving real business problems through technology.

Education

GLA University, Mathura, Uttar Pradesh 2023 – 2027
Bachelor of Technology — Computer Science *Current CPI: 7.01*

Technical Skills

Languages & OOP: Java, SQL
Frontend: React.js, JavaScript, HTML5, CSS3, Bootstrap
Backend: Node.js, Express.js, REST API, JWT Authentication
Databases: MySQL, MongoDB
Cloud & AI: AWS (EC2, S3), Azure OpenAI Service, Prompt Engineering, ChatGPT, LLMs
Tools: Git, GitHub, VS Code, Eclipse, Vercel (deployment)
Concepts: Data Structures & Algorithms, OOP Design, Agile Collaboration

Experience

Gen AI with Azure — Job-Oriented Value Added Course June 2025 – July 2025

- Completed hands-on training in Microsoft Azure Generative AI, working with Azure OpenAI Service and Azure AI Studio.
- Built an AI-powered question-answering application using custom Prompt Engineering techniques and LLM integration.
- Worked with Azure Cognitive Services APIs to integrate vision and language capabilities into cloud-based solutions.
- Gained practical experience deploying AI models on Azure, understanding cloud infrastructure, scalability, and reliability.

Projects

Food Delivery Web Platform May 2026 – July 2026
React.js, Node.js, Express.js, MongoDB, JWT / LINK

- Developed a full-stack food ordering platform with authentication, cart management, and order tracking.
- Designed and built RESTful APIs following REST best practices; integrated MongoDB.
- Implemented secure JWT-based user authentication with role management; deployed on Vercel via GitHub.
- Built a fully responsive UI supporting desktop, applying component-driven architecture for maintainability and scalability in the project.

Smart Attendance System Jan 2026 – March 2026
React.js, Node.js, Express.js, MongoDB, JWT / LINK

- Built a full-stack automated attendance tracking system with role-based access control for Admin, Faculty, and Student roles (3 distinct user types).
- Designed scalable MongoDB data models and RESTful APIs supporting efficient attendance recording and retrieval across multiple classes and semesters.
- Implemented JWT authentication with role-based route protection; applied OOP principles for modular, maintainable backend service architecture.
- Engineered a responsive React UI with real-time attendance dashboards and analytics views for faculty and admin stakeholders.

Achievements & Problem Solving

- Solved 300+ Data Structures & Algorithms problems on LeetCode — covering arrays, trees, dynamic programming, and sorting algorithms.
- HackerRank Certified in Java and Python — demonstrating proficiency in OOP and scripting.
- Participated in Hack & Wiz 2.0 Hackathon — 24-hour competitive coding event, collaborated in a team to design and ship a working prototype.
- Organized E-Summit (200+ participants) as part of E-Cell GLAU — demonstrated leadership, cross-team coordination, and stakeholder communication.

Additional Information

- Passionate about building scalable software solutions, solving complex engineering problems, and continuously learning emerging technologies.
- Strong analytical and problem-solving skills with experience in team collaboration and agile development environments.
